

Github Campus Expert and Student Developer Packages Day 6

25 April 2020

GitHub Campus Expert

Introduction

1. <https://education.github.com/students/experts>
2. Before applying to the program you need to verify that you're a student and for that you need to either upload your institute ID or sign-up with your institute email id.
3. Once you've been verified you can proceed to the next step which is filling up the initial application.
4. The second phase of the program is the training, where you work with amazingly designed modules which helps you to be a better community leader
5. if you complete the modules with the same enthusiasm you started it with, you're going to be a great leader.

6. Once you've completed the modules, the next step is to wait and be patient.
7. Your submissions undergo a detailed review.
8. Unlike any other program, the review team very thoroughly reads and reviews each and every submission and provides you feedback to improve it.
9. The GitHub Campus Expert program is an amazing opportunity to help your local community. The program focuses on your local community and helps you to build and grow your local community. This is not an ambassador program unlike others, the program actually focuses on supporting you to help you grow your community.

GitHub Student Developer Packages

1. <https://education.github.com/pack>
2. <https://github.blog/2019-10-30-get-over-100k-worth-of-tools-with-the-git-hub-student-developer-pack/>
3. Most of the professional-grade software comes at a cost that, all most all the students in this world can't afford, this is where **GitHub Education** comes into the picture. **GitHub Education** is an platform which offers students real-world experience with *free* access to various developer tools
